	Instruction
ECS ELITEGROUP 精英電腦 股份有限公司	**Firmware crisis recovery**

➢ **Crisis recovery:**

1. Prepare an USB key. (Format to FAT or FAT32 type first.)
2. Unzip the BIOS file. Copy AMI_GLK_SPI_8mb.bin to root directory of the USB key and rename EH20GM.BIN .
3. Insert the USB key to the USB port.
4. Turn off the system. Skip this step if the system is already power off.
5. Plug-in an adapter and hold the both key <Fn> and <R> in internal keyboard.
6. Power-on the system by power button.
7. The system will enter crisis mode and recovery BIOS automatically.
