

- → Stick auswählen
- → gparted-live-0.28.1-1-amd64.iso auswählen

- → Format mit Fat32 wählen
- $\rightarrow$  Blitz!

Von USB-Stick booten

10 für German/Deutsch

0 um X zu starten

#### Partitionsübersicht

Sda1 anpassen:

Größe ändern/verschieben

Hier statt der 4000 die gewünschte Größe wählen. WICHTIG! Hinter der bestehenden Partition!

Empfehlen würde ich 8 oder 16 GB für die OS-Partition

Im nicht zugeordneten Bereich eine neue Partition erstellen

Größe kann so bleiben, wichtig ist EXT4, sonst erkennt OMV die Partition nicht.

## Apply/Anwenden

Fertig!

## Gparted beenden

Reboot/Shutdown, Stick ab

Username: admin
Passwort: openmediavault

## Dateisysteme

## Einbinden

# Anwenden und Fertig
