

M10

description

The sleek M10 is the smallest enclosure in the Origen^{ae} family of products measuring in at only 106mm in height and 240mm in width. The M10 boasts a form factor that provides an aesthetic and performance potential that is unmatched.

Whilst the M10 is petite in size it does not sacrifice the performance of the system in order to achieve this, with the quality 150W power supply included you have the ability to install a powerful system inside the enclosure.

Through the M10 enclosures support of the ITX motherboard form factor, you have the convenience of a widely available form factor. With ITX motherboards now supporting up to quad core cpu's without the large aesthetic size sacrifices of traditional larger motherboards you can build a very powerful system in a very small space.

Like all Origen^{ae} enclosures the construction is of the highest quality with a premium full aluminum build and innovative cooling engineering for optimal hardware performance. Coupled with an Origen^{ae} display the M10 is a perfect addition for your home theater or any other Small Form Factor application where superb design and supreme quality is a requisite.

specifications

external dimensions (w x h x d)	- 240 x 106 x 250mm (*inc feet)
construction material	- all aluminum chassis
mainboard support	- mini itx
psu(*inc)	- external adapter (150w)
pci / agp card support	- low profile
drive bays	- 1 x 2.5" internal drive bay - slim optical drive bay (slot type)
fan support	- 1 x 60mm intake fan - 1 x 60mm exhaust fan (optional)
expansion slot	- 1
ir / vfd solution	- vf210 vfd / ir module (default) - vf310 vfd / ir module (optional)
net weight	- ~3kg
available colours	- black, silver
