CHECK FOR UPDATES

PLUGIN	AUTHOR	VERSION	STATUS	UNINSTALL
CA Auto Turbo Write Mode				
Part of the CA family, CA Auto Turbo Write Mode will enable or disable unRaid's turbo write mode (reconstruct write) based upon the number of drives currently spun up.	Andrew Zawadzki	2023.03.02 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
CA Auto Update Applications				
Part of the CA family, Auto Update Applications will keep your selected plugins and docker applications up to date	Andrew Zawadzki	2023.07.05 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
CA Backup / Restore Appdata				
Part of the CA family, CA Backup / Restore Appdata will either manually or on a schedule, automatically backup your docker appdata for easy restoring in case of a cache drive failure	Robin Kluth	2023.03.28c 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
CA Dynamix Unlimited Width				
A plugin to allow Dynamix to utilize the entire width of your browser and not be artificially capped at 1920 pixel across	Andrew Zawadzki	2020.05.27 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Community Applications				
The One Stop Shop for all applications for Unraid	Andrew Zawadzki	2023.07.03 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Compose.Manager				
This plugin installs the docker compose package on you unRAID server and adds a simple manager page to the web ui.	dcflachs	2023.05.24 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix Cache Directories				
Dynamix Cache Directories keeps folder information in memory to prevent unnecessary disk spin up. Dynamix builds a GUI front-end to allow entering of parameters for the cache_dirs script which is running in the background.	Bergware	2023.02.19 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix File Manager				
This plugin adds a simple file management functionality to the existing file browser function of the Unraid GUI. ⌄	Bergware	2023.06.01 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix Stop Shell				
The Dynamix Stop Shell plugin adds a script which gets invoked when the array is stopped. This script looks for any open shells in /mnt/... and terminate them. This ensures the array can be stopped. *Be aware that automatic terminating of open shells may lead to data loss if an active process is writing to the array.*	Bergware	2023.02.05 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix System Information				
Dynamix System Information shows various details of your system hardware and BIOS. This includes processor, memory and sub-system components.	Bergware	2023.02.05 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix System Statistics				
Dynamix System Stats shows in real-time the disk utilizations and critical system recources, such CPU usage, memory usage, interface bandwidth and disk I/O bandwidth.	Bergware	2023.02.14 🛈	✔ up-to-date	☐ REMOVE
Support Thread				
Dynamix System Temperature				
Dynamix System Temperature shows in real time the temperature of the	Bergware	2023.02.04b 🛈	✔ up-to-date	☐ REMOVE

Support Thread

GUI Search

A utility to allow you to search for any of Unraid's settings and navigate you there

| | Andrew Zawadzki | 2023.08.02 ⓘ | ✔ up-to-date | ☐ REMOVE |

Support Thread

Intel GPU TOP

This plugin adds the tool 'intel_gpu_top' to your unRAID server and also enables your Intel iGPU from the installation of this plugin on, so no editis to the 'go' file or creation of other files are necessary. To see the usage of your iGPU open up the unRAID Terminal and type in 'intel_gpu_top' (without quotes). This plugin satisfies installation prerequisites of the GPU Statistics plugin from Community Apps. With both plugins installed you can display Intel GPU utilization on the unRAID Dashboard.

Support Thread

Tasmota Power Monitor

Turn a Tasmota device into an energy monitor and show the values in the dashboard

| | SimonFair | 2023.06.17 ⓘ | ✔ up-to-date | ☐ REMOVE |

Support Thread

Tips and Tweaks

This plugin lets you change certain Linux settings that may improve performance of your Unraid server. If you remove the tips.and.tweaks plugin, the last settings will remain until Unraid is rebooted.

| | dlandon | 2023.07.23 ⓘ | ✔ up-to-date | ☐ REMOVE |

Support Thread

Unassigned Devices

This plugin uses UDEV to automount and share disks that are not part of your Unraid array. Available devices are listed under the "Main/Unassigned Devices" tab. You can also mount remote SMB and NFS shares on other servers.

| | dlandon | 2023.08.13 ⓘ | ✔ up-to-date | ☐ REMOVE |

Support Thread

Unassigned Devices Plus

| | dlandon | 2023.08.14 ⓘ | ✔ up-to-date | ☐ REMOVE |

Unassigned Devices support for HFS+, exFAT, and apfs disk formats, and enabling destructive mode.

PLUGIN	AUTHOR	VERSION	STATUS	UNINSTALL

Support Thread

Unassigned Devices Preclear

This plugin is a utility to exercise and clear disk drives prior to adding them to the Unraid array, or to erase them prior to disposal. You can use the built in 'Enhanced' script or 'Docker' – the binhex Docker Container to preclear disks. The binhex Docker Container must be installed and running for the 'Docker' option.

dlandon   2023.08.14 ⓘ   ✔ up-to-date   ☐ REMOVE

Support Thread

unBALANCE

unBALANCE frees up space from one disk in your array, by moving the user shares folders you select to other disks in the array.

Juan B. Rodriguez   v2021.04.21 ⓘ   ✔ up-to-date   ☐ REMOVE

Support Thread

Unraid Connect

Unraid Connect is your one-stop shop for server management, monitoring, and maintenance. Enjoy the convenience and connectivity of the cloud and take your Unraid experience to the next level with Connect.
